

TUGAS PENDAHULUAN 3

Nama : Nadia Tambunan
NIM : 103122400005
Kelas : SE-08-01

1. Buat Tabel

The screenshot shows the SQL Developer interface with the following components:

- Worksheet:** Contains the SQL statement:

```
CREATE TABLE mahasiswa (  
  id char(12),  
  nama VARCHAR(100),  
  tempat_lahir VARCHAR(100),  
  tanggal_lahir DATE,  
  nomor_hp char(14),  
  email VARCHAR(100),  
  tinggi_badan INT,  
  berat_badan INT);
```
- Script Output:** Displays the execution results and an error message:

```
Task completed in 0.218 seconds  
nomor_hp char(14),  
email VARCHAR(100),  
tinggi_badan INT PRIMARY KEY,  
berat_badan INT PRIMARY KEY)  
Error report -  
ORA-02260: table can have only one primary key  
  
https://docs.oracle.com/error-help/db/ora-02260/02260.00000 - "table can have only one primary key"  
*Cause: Self-evident.  
*Action: Remove the extra primary key.  
  
Table MAHASISWA created.
```
- Query Result:** Shows the SQL statement:

```
SELECT * FROM mahasiswa;
```
- Table Structure:** A table with 8 columns: ID, NAMA, TEMPAT_..., TANGGAL..., NOMOR_HP, EMAIL, TINGGI_B..., and BERAT_B....

2. Insert 15 Rows (data saya minta AI untuk buat)

```
INSERT ALL
INTO mahasiswa VALUES ('103122400001', 'Ahmad Wijaya', 'Jakarta', TO_DATE('2004-01-15', 'YYYY-MM-DD'),

```

Script Output x Query Result x

Task completed in 0.049 seconds

*Params: 1) invalid_char
the character string that is being converted to a number or
UNISTR (character string) if the character is not compatible
with the database character set.
2) column_or_expression: The column or expression from where the
invalid character comes.

More Details :
